Stanley Xu
Longwell Company
12000 NE 8th St #200
Bellevue WA 98005

Mr. Xu

Thank you for participating in PSE's Multifamily Retrofit Weatherization Program. Longwell Company has worked closely with PSE staff to identify energy efficient upgrade opportunities in apartment complexes your company owns and manages in the PSE utility service area. Energy efficiency upgrades incorporated in the complexes identified below will be saving your tenants money for years to come.

Forest Cove Apartments: 388 units

Park Ridge Apartments: 249 units

Pinewood Square Apartments: 180 units

Efforts are continuing with similar upgrades currently underway at Brittany Park Apartments (190 units).

Energy efficient upgrades include in-unit lighting and water saving device replacements, Attic and floor insulation and high efficient window replacements. These installed measures will save your tenants 1,700,000 kWh per year.

It is obvious the Longwell Company is making a serious commitment to ensure the wise use of valuable resources by committing their own resources in an effort to reduce energy waste and in that effort improving the quality of life for the residents of their properties.

Puget Sound Energy is proud to recognize Longwell Company's efforts and commitment to improve the overall environmental impact of their properties by reducing the total energy requirement. Longwell Company is providing an excellent example for other property owners to emulate and they are to be commended.

Sincerely:

John N Forde Jr
Multifamily Market Manager
